Applications

- For general use in the wood and metalworking industries to prepare natural surfaces for finishing, paint removal and substrate renovation.
- Designed for operations that require high-quality finishes and performance, operating on wood and metal substrates.
- Can be used manually or with orbital sanders.
- Ideal tool for cleaning and polishing wood, plastics, lacquers, paint, ferrous and nonferrous metals.
- Wide range of degrees allows heavy, intermediate and fine sanding operations.

Characteristics

- Provides optimum-quality finishes.
- Its closed structure increases sanding power.
