Hand Sanding

Sheets can be cut into

To use with sander  
1/2 sheets

To use with sander  
1/3 sheets

To use with sander  
1/4 sheets

# ***Sheets*** **C081** **D081**

Within its range of products, **FANDELI** offers the **C081** and **D081** lines, which are ideal for optimizing the sanding and finishing of wood and metal pieces.

Both lines are manufactured with a highly resistant paper backing coated with Aluminum Oxide.

The **C081** serie is manufactured in 280\* 240 220 150, 120 and 100 grit thicker paper backing covers the 80 to 36 grit range.

The open coat of these product lines allows them to be durable and long lasting in the finishing of hard, soft or resinous woods. They are also ideal for the fillings and sanding of flat metallic surfaces where it is necessary to remove layers of pastes, fillers or paints.

Handcraft use is manual and machine assisted where industrial applications are used with orbital pneumatic or power tools.

**D081** also available in body files 2 3/4 "x 17 1/2" for manual operations.

Standard size is in 9"x 11" sheet; other sizes are available upon request.
