GRADE AVAILABILITY

INTERMEDIATE FINISH/FINAL FINISH

Applications

- Ideal for work on bare wood, with sealers, moldings, and irregular and carved pieces.
- Excellent for firming down sealers and varnishes on flat and irregular surfaces.
- For cleaning, finishing and conditioning metals: stainless steel, carbon, aluminum, bronze and wrought iron.
- Optimal for satin paint finishes, provides an excellent anchor for the new coat of paint.

Characteristics

- Great flexibility allows the adaptation of the product to the surface without deforming the shape of the piece.
- Micro-smooth metal finishes.
- Doesn't clog; dissipates heat and produces uniform scratch patterns in the pieces.
- Save significantly on dyes, sealers, and varnishes by closing the pores on surfaces to reduce absorption.
- Designed to be an economical rust-removal option in metals. Measurements: 6" x 9".
