Applications

- For professional-quality sanding operations.
- Ideal for surface preparation in the wood industry to remove paint and rough edges; essential to apply before lacquers, paint and varnish to achieve a good finish.
- From natural wood processes, scratch and stain repairs and renovations.
- Functional for plaster and clay and to remove paint layers.
- Can be used for dry sanding of plastics and nonferrous metals.

Characteristics

- Open structure prevents premature clogging of the product, extending its shelf life.
- The versatility of the abrasive grits provides different finishes for various processes.
