HEAVY POLISHING / INTERMEDIATE FINISH

Applications

- Designed for industrial operations and shops that require finishing and heavy polishing operations.
- Can be used manually or with orbital sanders.
- Ideal tool to efficiently clean over ferrous metals for oxides and burrs, and nonferrous metals like solid stone.
- Grade range covers heavy, intermediate and fine sanding tasks, works with great tenacity and long duration on surfaces where appearance or finish is not needed, only the preparation of pieces for another step or for cleaning surfaces.

Characteristics

- Cotton fabric backing and closed structure ensures a powerful sanding action, product of great durability and resistance.
