Applications

- For polishing and intermediate finishing operations of stainless steel and high-hardness metals, such as stainless-steel canvases and glossy and woven materials.
- Must be applied in the same direction to homogenize the scratches and care of the worked surface.
- Must be applied in the same direction to homogenize the scratches and care of the worked surface.
- For finishing processes on railings, pipes and stainless-steel attachments.
- Includes pretreatment for reflective polished finishes.

Characteristics

- Zirconia Alumina abrasive grains provide excellent performance and a good finish.
- Its structure with self-sharpening properties guarantee a medium to aggressive polishing action and excellent resistance to strong pressures.
