Applications

- For industrial intermediate polishing and finishing operations in the metalworking industry, such as when working on metal canvases, laminates, pre-polishing and flat, glossy surfaces.
- For metal surface finishes.
- For treating metal roofs, panels and plates.
- For the manufacture and preparation of die-cut plates, including the manufacture of laminates for machine components or industrial roofing canvases.
- Good performance on nonferrous metals.

Characteristics

- Strong backing and closed Aluminum Oxide coat provides heavy polishing action that produces excellent finishes.
- Is washable for reuse due to plaster and contamination during some surface operations.
